## **BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

**IMAGES ARE BEST AVAILABLE COPY.**

**As rescanning documents *will not* correct images,  
please do not report the images to the  
Image Problem Mailbox.**

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-8 (Canceled).

1  
Claim ~~9~~ (Currently Amended): A monoclonal antibody which:

(1) reacts specifically with a human apolipoprotein A-I occurring in HDL which contains no human apolipoprotein A-II and has a molecular weight of 150,000 Da or less; and

(2) which reacts specifically with a human apolipoprotein A-I not ~~binding~~ <sup>bound</sup> to a lipid, but which does not react with (a) HDL containing apoA-II, (b) ~~VLDL~~ VLDL, (c) LDL, or (d) HDL2,

(3) wherein the reactivity of said monoclonal antibody to blood plasma incubated at 37°C for two hours is lower compared to its reactivity to unheated blood plasma.

2  
Claim ~~10~~ (Previously Presented): The monoclonal antibody of Claim 9 which is produced by hybridoma cell line 55201 deposited as FERM BP-6938.

3  
Claim ~~11~~ (Previously Presented): The antibody of Claim 9 which has been labeled.

4  
Claim ~~12~~ (Currently Amended): The antibody of Claim 9 which has been labeled with biotin, peroxidase, ~~alkaline peroxidase~~ alkaline phosphatase, glucoamylase or  $\beta$ -galactosidase.

5  
Claim ~~13~~ (Previously Presented): The antibody of Claim 9 which has been labeled with  $^{125}\text{I}$ ,  $^{131}\text{I}$  or tritium.

<sup>6</sup>  
Claim ~~14~~ (Previously Presented): A solid support to which the antibody of Claim 9 has been attached.

<sup>7</sup>  
Claim ~~15~~ (Previously Presented): A composition comprising the monoclonal antibody of Claim 9 and a buffer or diluent.

<sup>8</sup>  
Claim ~~16~~ (Previously Presented): A hybridoma cell line which produces the monoclonal antibody of Claim 9.

<sup>9</sup>  
Claim ~~17~~ (Previously Presented): Hybridoma cell line 55201 deposited as FERM BP-6938.

<sup>10</sup>  
Claim ~~18~~ (Currently Amended): An immunoassay for apoA-I comprising:  
contacting the monoclonal antibody of Claim 9 with a sample suspected of containing apoA-I for a time and under conditions suitable for binding of said antibody to apoA-I,  
determining binding between said antibody and apoA-I, and  
relating the binding to the presence or amount of said apoA-I in said sample.

<sup>11</sup>  
Claim ~~19~~ (Previously Presented): The immunoassay of Claim 18 which is a RIA.

<sup>12</sup>  
Claim ~~20~~ (Previously Presented): The immunoassay of Claim 18 which is an EIA.

Claim <sup>13</sup>~~21~~ (Currently Amended): The immunoassay of Claim ~~17~~ 18, wherein binding of said antibody to apoA-I is determined before and after heating the sample and the amount of reduction or percentage reduction in binding between the sample before heating and the sample after heating is determined.
